

Reference on behalf of Muter Construction

To whom this letter affects:

My name is Scotty Henley and I'm the director for the Clayton Center which houses Clayton's Town Hall, Auditorium and Conference Center. I oversee the Auditorium and Conference Center where the latest window extraction and replacement was performed by Muter Construction starting in late spring and concluding early summer of 2016.

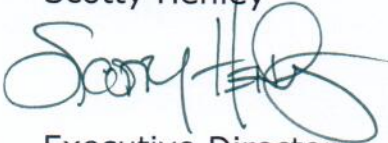

Jake Bowman, along with his principle staff, handled the entire project with professionalism concerned with not only the proper removal, installation, painting and clean up to this 100 year old venue, but equally the execution of even the minutest details like our 100 year old, crafted on site, brick mold detail. Within the course of the project we discovered a discrepancy in the window production company's brick mold which did not align with our current detail carried throughout the rest of the facility. Without hesitation, Jake sat down with the key agents on this project and devised a solution the Town of Clayton is very happy with.

Muter construction, with Jake as a project manager, are extremely concerned with the whole process a project entails. From preliminary meetings, which we held weekly, communications between all parties, onsite leadership, to finally evaluation and clean up, Jake and his crew were on top of every detail and need.

I would highly recommend Muter construction for your next project not only from the perspective of how our whole project finished out, but also on how our project began.

Respectfully,

Scotty Henley

A handwritten signature in black ink, appearing to read 'Scotty Henley', written over a faint printed name.
